Objectives-

- To create love for environment by making best out of waste with help of recyclable things
- To explore imagination and creativity to make innovative things.
- To provide a platform wherein students could show up their artistic skills with available material .

About Event –

Now a days the waste is a global issue this is because it is posing a huge threat to the environment and public health. Now its time to require a very innovative approach to get rid of them. Recycling and reusing the valuable waste material can result in development of fantastic and usable products. Rather than putting these waste materials into the landfills, various innovative and creative ideas can be put together to being something new and useful.

Students of both the departments (MCA and MBA) participated in the competition with immense zeal and enthusiasm and made beautiful Models and Decorative things. It was a great opportunity to watch these young minds creating and displaying their ideas recycle the waste things. The students thoroughly enjoyed the activity.
