Jayawant Institute of Management Studies, Tathawade, Pune-33

MCA- POs and PSOs

MCA Programme:-

The basic objective of the Master of Computer Applications (MCA) is to provide a steady stream of necessary knowledge, skills and foundation for acquiring a wide range of rewarding careers into rapidly expanding world of Information Technology.

MCA - Programme Outcomes (POs):-

1. **PO1:** Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.
2. **PO2:** Identify, formulate, research literature, and solve complex Computing problems reaching substantiated conclusions using fundamental principles of Mathematics, Computing sciences, and relevant domain disciplines.
3. **PO3:** Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations
4. **PO4:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusions.
5. **PO5:** Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.
6. **PO6:** Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.
7. **PO7:** Recognize the need, and have the ability, to engage in independent learning for continual development as a Computing professional.

8. **PO8:** Demonstrate knowledge and understanding of computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
9. **PO9:** : Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.
10. **PO10:** Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.
11. **PO11:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
12. **PO12:** Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

MCA- Programme Specific Outcomes (PSOs):-

1. **PSO1:** Apply the knowledge of computer application to find solutions for real-life application.
2. **PSO2:** Ability to analyze, design, develop and maintain the software application with latest technologies.
3. **PSO3:** Utilize skills and knowledge for computing practice with commitment on social, ethical, cyber and legal values.
4. **PSO4:** Inculcate employability and entrepreneur skills among students who can develop customized solutions for small to large Enterprises.
