Programming *Laungage*

Our *Services*

“ A to Z of Python Programming

”

About *Python Programming*

Python Programming is intended for software engineers, systems analysts, program managers and user support personnel who wish to learn the Python programming language.

This Python for beginners training course leads the students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules. Extra emphasis is placed on features unique to Python, such as tuples, array slices, and output formatting.

Our *Objectives*

- Master the fundamentals of writing Python scripts
- Learn core Python scripting elements such as variables and flow control structures

Discover how to work with lists and sequence data

- Write Python functions to facilitate code reuse
- Use Python to read and write files

About JIMS

JSPM's Jaywant Institute of Management Studies (JIMS) is approved by All India Council for Technical Education, New Delhi and the Courses MBA and MCA are affiliated to the University of Pune. From a modest beginning in 2004, Jaywant Institute of Management Studies (JIMS) has now grown into a fully integrated management and computer institute.

The guiding philosophy of the institute is 'creation of knowledge and influencing management practices.'

- To overcome the fear of public speaking

What is IoT?

Internet of Things (IoT) is a new revolution of the Internet and a hot technology worldwide. Government, academia, and industry are involved in different aspects of research, implementation and business with IoT. IoT cuts across different application domain verticals ranging from civilian to defense sectors. These domains include agriculture, space, healthcare, manufacturing, construction, water, and mining, which are presently transitioning their infrastructure to support IoT. A device become a smart device is called IOT. Now a days there are many android and server based application.

In this system, value of sensor (e.g. temperature sensor, motion sensor, accelerometer sensor etc.) will be shown on GUI or web server or android application through wireless communication and device will be controlled automatically. Device will be operated on Wi-Fi / GPRS. Internet of Things, or IOT in short, is the idea of making devices and objects smarter by linking them to the internet.

Internet Of Things

Course Code: TS 04

Academic year: 2018-19

Course Contents

- Introduction to android and server based application.
- Reading value of sensor through wireless communication and
- Control device
- Develop an electronic device and sensor using Arduino development kit
- Projects to control buzzer / LED

Internet of Things

Course code: TS04

Course objectives

- This program mainly aims at providing an opportunity for students to enrich their knowledge and skill in the area of IOT by developing various projects
- Provide introduction to Internet of Things (IoT)
- Exposure to various fields and technology stacks of IoT
- Enable people to convert their IoT product idea into a working prototype
- Provide thorough working knowledge of the Raspberry Pi Platform
- Bring-up entrepreneurs and innovators by supporting them with mentorship
