Intentional Webinar

"Artificial Intelligence and Machine learning"

Topic of Webinar - Artificial Intelligence and Machine learning

Webinar Date& Day – 3rd June 2020 to 5th June 2020

Time – 3:00 pm to 4:30 pm (Everyday)

About Guest -

Day: 1 (Wednesday, 3rd June, 2020)

Time: 3:00 PM onwards (15:00)

Speaker: Dr. Utku Kose, Associate Professor in Suleyman Demirel University, Turkey.

Day: 2 (Thursday, 4th June, 2020)

Time: 3:00 PM onwards (15:00)

Speaker: Mr.Subodh Jadhav, Technical Team Lead at Morningstar Australasia Sydney, Australia

Day: 3 (Friday, 5th June, 2020)

Time: 3:00 PM onwards (15:00)

Speaker: Mr. Kennedy K Wangari, Data Scientist | | Al Community Leader

Objectives-

- Learn what are sub-fields of artificial intelligence and Machine Learning
- Review challenges with respect to practical implementation of Artificial Intelligence
- Discuss Near and Far Future of Artificial Intelligence
- Understand Impact of Machine Learning & Artificial Intelligence in Data Science
- Know various Opportunities and Challenges in Data Science Careers

About Webinar-

With the abundance of data being generated every day, the rise of new automated technologies is inevitable. Join Lillian Pierson, internationally renowned Big Data and Data Science author, as she explores the wonders of Machine Learning and AI.

A whole world is relying on machine learning to develop mission-critical applications to empower the businesses. However, there are a series of challenges one has to tackle in the machine learning application building lifecycle — right from combining multiple data sources to feature engineering which means finding the right parameters to extract from the data for model building. So, what's the best approach to AI/ML applications and how does one identify the data sources to build models. With demand for machine learning increasing, it's up to the data scientists and developers to stay updated with the latest trends to get the best performance out of their applications.

With machine learning becoming a critical enabler for every sector, this webinar is specifically aimed at machine learning students, engineers and data scientists to help them understand the fundamental concepts of AI & ML and help them leverage cloud machine learning tools. During this seminar participants were introduced to the world of machine learning, artificial intelligence, and thinking machines.

Skills Focused-

Outcomes -

After attending this webinar participants were able to:

- Discover various applications of AI &ML
- Know Practical implementation of AWS Racer
- Know what is Artificial Intelligence?
- Know various Sub-fields of Artificial Intelligence / Some Techniques
- Artificial Intelligence in Present Problems
- Near and Far Future of Artificial Intelligence

Glimpses of the event -
